

# DXRA DataExpress Remote Agent

A specifically designed application deployable as a remote agent enabling secure bi-directional file transfer capabilities with DataExpress Open Platform (DXOP) servers. DXRA removes the remote office need to understand the comprehensive intricacies of secure managed file transfer.

## DXRA Manager

- Add on feature of DXOP
- Foundation for DX Remote Agent
- Enhances security and capability
- Allows for re-use of subscribed licenses
- Allows instant allocation and de-allocation of DX Remote Agents from DXOP server removing the requirement for certificate management
- Comprehensive Remote Agent auditing

## DXRA Features

- Subscription service
- DXOP Server initiated and controlled
- File Distribution and collection initiated and controlled by DXOP server only
- Configurable to communicate securely with only known DXOP server by IP address, username and password
- Pre and post processing and script execution
- Automatic encryption/decryption
- Email notification to DXRA user when files are exchanged with DXOP server.
- “Drag and Drop” operation by user to/from specified “watched” directory triggers file transfer event.

## DXRA Enablement

- Customized professional enabling services for distribution and management.
- One-time “onboarding” fee for blocks of 10 DX remote agents.
- Logo co-branding option

## DXRA FEATURES

- SMALL FOOTPRINT
- SECURE TRANSFER
- AUTOMATIC SESSION ENCRYPTION
- DRAG AND DROP
- CENTRALIZED CONTROL
